

Professional Summary

- Computer Engineering graduate and Cybersecurity Engineering Intern at Paramount Computer Systems, with experience in Windows Server administration, Active Directory, Microsoft Azure, Microsoft 365, PowerShell automation, networking, and technical support. Strong foundations in cloud computing, cybersecurity, software testing, and secure systems. Currently developing practical knowledge through the PCCP Cloud Services program, with career interests in SOC operations, cloud security, network security, and incident response.

Education

- 2026 – Present **M.Sc. in Computer Science**, Princess Sumaya University for Technology — Amman, Jordan
- 2020 – 2025 **B.Sc. in Computer Engineering**, University of Jordan, Amman, Jordan
- 2019 – 2020 **High School Diploma (Tawjihi)**, Al-Jazeera School, Amman, Jordan

Skills

Cybersecurity	SOC fundamentals, familiarity with security monitoring and alert triage, incident response lifecycle, phishing analysis fundamentals, access control, and least privilege
Cloud & Identity	Microsoft Azure fundamentals, Microsoft 365, Microsoft Entra ID fundamentals, RBAC, MFA, VNETs, subnets, and Network Security Groups
Systems & Networking	Windows Server, Active Directory Domain Services (AD DS), Linux/Ubuntu, TCP/IP, DNS, DHCP, VLANs, VPNs, firewalls
Programming	Java, Python, C++, Assembly, JavaScript, Solidity, SQL, MATLAB, Node.js, CSS
Automation & Scripting	PowerShell, Python scripting, administrative task automation
Software Testing	Manual testing, test case design, bug reporting, Cypress, Jira, Agile, Scrum
Tools & Tech	AutoCAD, LaTeX, LabVIEW, Proteus, Jira, Cypress, academic research
Soft Skills	Problem solving, analytical thinking, communication, teamwork, adaptability
Languages	Arabic (native), English (professional working proficiency)

Professional Experience

Experience

- Jul 2026–Present **Cybersecurity Engineering – PCCP Cloud Services** — Paramount Computer Systems, Remote, UAE
 - Participating in the PCCP 2026 Cloud Services program focused on cloud technologies, cybersecurity, and enterprise operations.
 - Completing mentor-led technical training, assignments, and collaborative learning activities.
 - Developing knowledge of Microsoft Azure, Microsoft 365, security operations, threat monitoring, and incident response.
 - Strengthening practical skills in networking, Windows/Linux systems, cloud services, and defensive cybersecurity.
- Jun–Sep 2024 **IT Infrastructure Intern** — Electricity Distribution Co. (EDCO), Operating Systems Department
 - Automated administrative IT tasks using PowerShell to improve operational efficiency.
 - Managed Active Directory Domain Services (AD DS) user accounts, password resets, and access permissions.
 - Assisted with Microsoft Azure, Microsoft 365 administration, and user provisioning.
 - Provided Tier 1 technical support and maintained enterprise Windows-based systems.
 - Troubleshoot enterprise IT infrastructure and end-user service issues.
- 2021–Present **Freelance IT Support Technician** — Self-Employed
 - Installed and configured Windows operating systems, software, and device drivers.
 - Performed hardware diagnostics and component upgrades, including RAM, SSDs, and peripherals.
 - Removed malware and secured systems using antivirus and security tools.
 - Troubleshoot software, system performance, and hardware-related issues for end users.
 - Provided ongoing technical support and system optimization guidance.

Professional Experience (continued)

Awards and Achievements

- Jul 2025  **Twelfth National Technology Parade** — Placed 5th out of 17 participants in the Security and Defense Technology Hub.
- 2014  **Jordan Math Competition** — Placed 2nd out of approximately 5,000 participants nationwide.

Certifications

- Mar 2026  **Cypress 101** — TestMu AI
- Feb 2026  **Google Ads Search** — Google
-  **Industrial Networking Essentials** — Cisco
- Jan 2026  **Network Technician Career Path** — Cisco
-  **Introduction to Modern AI** — Cisco
- Nov 2024  **Cloud Foundations** — AWS Academy
- May 2023  **Introduction to Data Science** — Cisco
- Jul 2022  **Introduction to Cybersecurity** — Cisco
- Apr 2022  **Python Core** — Sololearn
- Oct 2021  **Using Databases with Python** — Coursera

Personal and Course Projects

- Jan 2026  **Personal Portfolio Website** — Built a responsive Progressive Web Application with offline caching, performance optimization, and Cypress end-to-end testing.
- Aug 2025  **SCADA Tank Level Monitoring System** — Developed an Arduino and LabVIEW monitoring system using an ultrasonic sensor, LEDs, alarms, and automated control logic.
- Jun 2025  **Decentralized Voting System on Ethereum Blockchain** — Developed a secure blockchain-based voting platform using Solidity smart contracts, MetaMask integration, role-based administrative controls, transaction validation, and vote-integrity enforcement.
- May 2025  **ROS 2 CPU Scheduling Simulation** — Simulated FCFS, Round Robin, and Priority scheduling algorithms with performance logging and metrics output.
- Nov 2023  **Digital Multimeter Assembly on PIC16F877A Microcontroller** — Developed and assembled a digital measurement system using a PIC microcontroller and supporting electronic components.
- Jun 2023  **Assembly Language and FPGA Projects** — Developed a piano simulation in Assembly language and designed an FPGA-based elevator controller using digital logic and finite-state machines.
- Jun 2021  **Arduino Uno Projects** — Developed a fingerprint door lock, universal remote-control system, and multi-speed fan controller.
