Website

Professional Summary

- Computer Engineering graduate and Cloud Services Intern at Paramount Computer Systems with experience in Microsoft Azure, Microsoft 365, Windows Server, Active Directory, Linux, networking, PowerShell automation, and enterprise IT support. Strong foundation in cloud infrastructure, system administration, TCP/IP networking, troubleshooting, and security. Currently developing hands-on cloud operations skills with an interest in multi-cloud environments, including Huawei Cloud.

Education

- 2026 – Present **M.Sc. in Computer Science**, Princess Sumaya University for Technology — Amman, Jordan
- 2020 – 2025 **B.Sc. in Computer Engineering**, University of Jordan, Amman, Jordan

Skills

Cloud & DevOps	Microsoft Azure, Microsoft 365, Docker, Entra ID, RBAC, MFA, VNets, sub-nets, NSGs, virtual machines
Systems & Networking	Windows Server, AD DS, Linux/Ubuntu, TCP/IP, DNS, DHCP, VLANs, VPNs, firewalls, network troubleshooting
Cloud Operations & Automation	PowerShell, Python scripting, user provisioning, system troubleshooting, cloud administration, monitoring
Cybersecurity	SOC fundamentals, security monitoring, alert triage, incident response, access control, least privilege
Programming	Python, Java, C++, SQL, JavaScript
Soft Skills	Problem solving, analytical thinking, communication, teamwork, adaptability
Languages	Arabic (native), English (professional working proficiency)

Professional Experience

Experience

- Jul 2026–Present **Cybersecurity Engineering – PCCP Cloud Services** — Paramount Computer Systems, Remote, UAE
 - Gaining hands-on experience with Microsoft Azure, Microsoft 365, and enterprise cloud security technologies through the PCCP Cloud Services program.
 - Configuring and working with Microsoft Entra ID, Conditional Access, MFA, RBAC, Privileged Identity Management, and identity governance controls.
 - Investigating security alerts and incidents using Microsoft Defender XDR and Microsoft Sentinel, including incident triage, threat hunting, and response workflows.
 - Working with Microsoft Purview information protection, data loss prevention, retention, and compliance capabilities.
 - Applying practical skills in KQL, PowerShell, Windows/Linux administration, networking, cloud infrastructure, and security operations.
- Jun–Sep 2024 **IT Infrastructure Intern** — Electricity Distribution Co. (EDCO), Operating Systems Department
 - Automated routine IT infrastructure and administrative tasks using PowerShell to improve operational efficiency.
 - Administered Active Directory Domain Services (AD DS) user accounts, password resets, and access permissions.
 - Supported Microsoft Azure and Microsoft 365 administration, account management, and user provisioning.
 - Provided Tier 1 technical support and assisted with the operation and maintenance of enterprise Windows-based systems.
 - Troubleshoot Windows systems, user access, application issues, and enterprise IT infrastructure problems.

Professional Experience (continued)

2021–Present

Freelance IT Support Technician — Self-Employed

- Installed, configured, and maintained Windows operating systems, software, device drivers, and end-user systems.
- Diagnosed hardware and system issues and performed component upgrades, including RAM, SSDs, and peripherals.
- Troubleshoot operating system, application, network connectivity, system performance, and hardware-related issues.
- Removed malware and applied antivirus and security controls to protect end-user systems.
- Provided ongoing technical support, system maintenance, and performance optimization guidance.

Awards and Achievements

- Jul 2025  **Twelfth National Technology Parade** — Placed 5th out of 17 participants in the Security and Defense Technology Hub.
- 2014  **Jordan Math Competition** — Placed 2nd out of approximately 5,000 participants nationwide.

Certifications

- Sep 2026  **AWS Certified Cloud Practitioner** — Amazon Web Services
-  **SC-200: Microsoft Security Operations Analyst Associate** — Microsoft
-  **SC-300: Microsoft Identity and Access Administrator** — Microsoft
- Aug 2026  **AZ-900: Microsoft Azure Fundamentals** — Microsoft
-  **SC-900: Security, Compliance, and Identity Fundamentals** — Microsoft
- Jul 2026  **Ethical Hacker** — Cisco
- 2026  **Industrial Networking Essentials** — Cisco
- Jan 2026  **Network Technician Career Path** — Cisco
- Nov 2024  **Cloud Foundations** — AWS Academy
- Jul 2022  **Introduction to Cybersecurity** — Cisco

Personal and Course Projects

- Jan 2026  **Personal Portfolio Website** — Built a responsive Progressive Web Application with offline caching, performance optimization, and Cypress end-to-end testing.
- Aug 2025  **SCADA Tank Level Monitoring System** — Developed an Arduino and LabVIEW monitoring system using an ultrasonic sensor, LEDs, alarms, and automated control logic.
- Jun 2025  **Decentralized Voting System on Ethereum Blockchain** — Developed a secure blockchain-based voting platform using Solidity smart contracts, MetaMask integration, role-based administrative controls, transaction validation, and vote-integrity enforcement.
- May 2025  **ROS 2 CPU Scheduling Simulation** — Simulated FCFS, Round Robin, and Priority scheduling algorithms with performance logging and metrics output.
- Nov 2023  **Digital Multimeter Assembly on PIC16F877A Microcontroller** — Developed and assembled a digital measurement system using a PIC microcontroller and supporting electronic components.
- Jun 2023  **Assembly Language and FPGA Projects** — Developed a piano simulation in Assembly language and designed an FPGA-based elevator controller using digital logic and finite-state machines.
